

The ESS tool

ESS – Edge Sealing System.

Manufacturer - Benteler Maschinenbau GmbH

Mod. ESS

Serial numbers: 30-2460-37

30-2457-37

Year of manufacture 2010

Edge sealing system is designated for the application of butyl sealing material onto the edges of a glass panel. The edge sealing system utilizes a butyl band applied to the isolated edge area. Two substrates are being processed simultaneously (batch operation).

Compressed air - 6 bar

Mains voltage - 400V, 50 Hz

Operating voltage- 24 VDC

Nordson connected load -70 kW

Tool standstill connected load -20 kW

Total connected load - 90 kW
